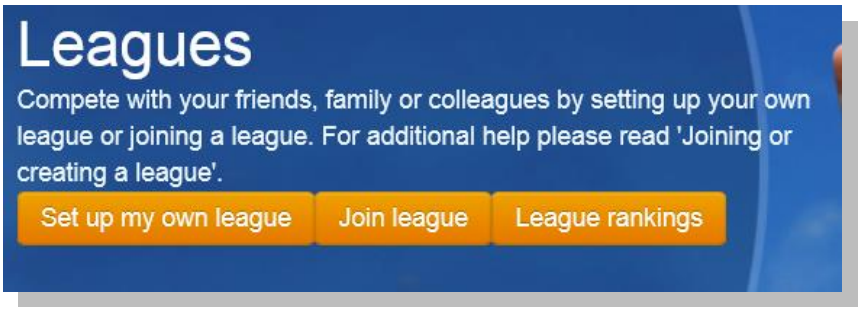
# Joining a league

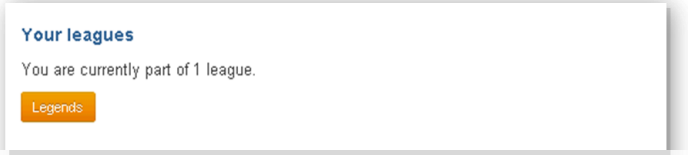
To join a league, first you need to sign up to the Game. To do this, sign up to or log into MyASX. Once logged in, on the MyASX home page, select the 'ASX Sharemarket Game' and register for the Game.

1) Once you are registered, go to the 'Game play' menu and scroll down to leagues.
2) On the leagues page, select 'Join league.'



3) On the 'Join league' page add the unique League ID number and the league password provided to you in the email from the league organiser.
4) Click on Join league and this will add you to the league.

5) At the top of your leagues page, you will be able to see which leagues you are a part of.



Once you have joined the league you will be able to see each person in your league and their portfolio value. (Only those in your league will be able to view this information.)

Your league will also have its own average portfolio value and be ranked alongside other leagues in the Game. The top 50 leagues will be shown on the ‘League Ranking’ page.

You can delete yourself from the league at any time.
