

Placing an order to buy or sell shares is the main activity of the Sharemarket Game. On this page you can buy and sell shares.

Step 1: Choose to buy or sell

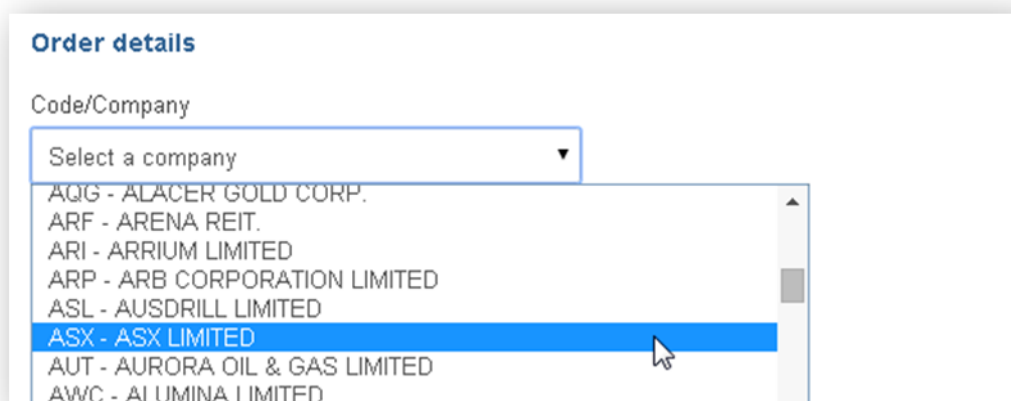

Your first order in the Game will be a buy order – so select the buy button. *Tip:* You can only sell stock that you have already purchased.

- AQG - ALACER GOLD CORP.
- ARF - ARENA REIT.
- ARI - ARRIUM LIMITED
- ARP - ARB CORPORATION LIMITED
- ASL - AUSTRILL LIMITED
- ASX - ASX LIMITED**
- AUT - AURORA OIL & GAS LIMITED
- AWC - ALUMINA LIMITED

Step 3: Enter the number of shares

The Game will let you know how many units you can buy under the Game's diversification rule. It is up to you as to how many you purchase as long as it complies with the diversification rule.

Tip: The diversification rule means your purchase cannot result in you having a holding that exceeds 25% or more of the dollar value of your total portfolio.

ASX - ASX LIMITED ▼

Number of shares

200

Code: ASX

Company name: ASX LIMITED

Last sale price: 35.14

\$+/-: -0.21

%+/-: -0.59%

You have 354 available units @ 35.14 to buy under the diversification rule.

Step 4: Choose the order type

Market to limit: This is the most common order type. A market to limit order is executed at the current best price. However, if the order is only partially filled and the price moves away, the remainder of the order is then automatically changed to a Limit order with the Limit price being the same as the filled portion of the order.

See [Understanding Order types](#) for more information

Limit: A limit price lets you set the price you want to buy or sell at. For a buy order you would set a price *below* the current market price to try and get to shares at a cheaper price. For a sell order you would enter at a price *higher* than the current market price to try and get a better sale price.
