

## What is player search all about?

Player search allows you to search for another player and see how they are going – their ranking, portfolio value, portfolio high and low, plus a chart of their performance.

**To find a player** you will need two things – their player name and the location that they have registered for in the Game.

On the player search page (see last menu item under the Game play)

- 1) Enter the player name
- 2) This will come up with a number of different player names that might be similar. However, player names are unique so it should be fairly easy to find the player you are looking for, and then use the location as a double check.

### Player search

This page allows you to do a search for other players in the Game. Once you find them you can view their portfolio and ranking. Simply do a search, select their name and see how they are faring.

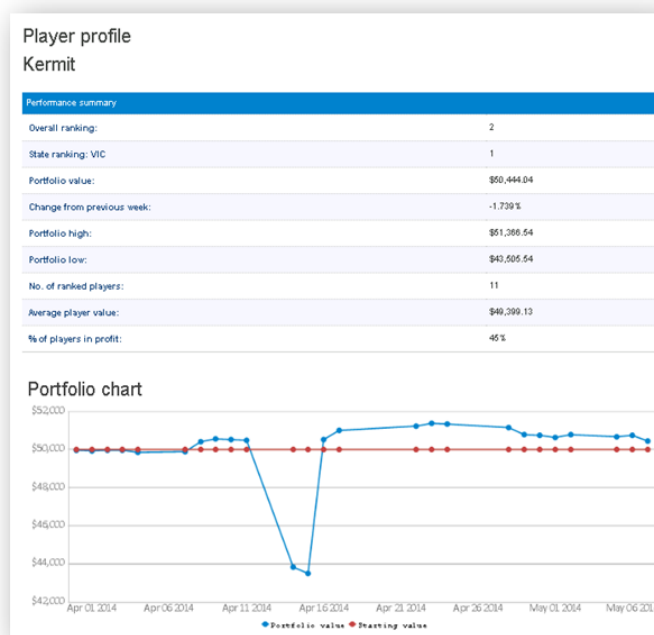

**Last week's leader - Magic**  
Portfolio value: \$51,449.22 Weekly change: 0.8%

**Most improved player - Kermit**  
Portfolio value: \$51,336.94 Weekly change: 1.7%

Enter a player name

Player name	State
Kermit	VIC

- 3) Once you find who you are looking for - click on the player name and this will take you to their player profile page where you get to see how they are going.

**Tip:** You can also view a player in the top 100 rankings – all you have to do is click on their player name and you can see their profile.
